Body Scan by the Quantum SCIO

The body scan is a device that scans the body energetically. Science has shown that the body is indeed electric. Therefore, electrical reactivity in the body can be measured via responses to impedance, amperage, voltage, capacitance, inductance, inductance and frequencies.

During testing the Quantum SCIO device resonates with thousands of tissues, organs, nutrients, toxins and allergens for one hundredth of a second each, and records the degree to which the body reacts.

The Quantum is taking today's technology and combining it with the science of acupuncture by reading the body's meridian system.

The full body scan can find many area's of imbalance by measuring:

- Adrenal balance
- Brain balance
- Immune system balance
- Hydration to the cells
- Oxidation to the cells

and can detect much more information such as:

- Organs that are stressed
- Spinal energy (will look at spinal area and detect subluxation and pinched nerves)
- Nutritional imbalances
- Hormonal imbalances
- Emotional imbalances
- Brain scan for nutrition
- Bacteria, viruses, parasites, fungus and other pathogens present
- Possible cause and aggravation of disease

The information read is from your entire lifetime. If you have toxins from childhood vaccinations, lived in a house that had asbestos, had an emotional trauma that is hindering your health, it will be detected.
