

Special Guests

### **April Renée**

Keynote speaker for VIC (Vaccine Injury Coalition) & former  
President of TAAP (The Autism Autoimmunity Project)

### **Andrew Moulden, MD, PhD**

Shows how vaccines are causing impaired blood flow and blood sludging, leading to microvascular strokes (ischemia). This impairs oxygen delivery and toxin removal, effects non-specific immune system hyperstimulation, derails cellular functions and impairs tissue healing in all organ systems.

The water shed end capillary blood vessel territories are the most susceptible. The end result is symptom based clinical "labels" such as Autism, SIDS, Learning Disabilities, ADD/ADHD, Dementia, Gulf War Syndrome and many more.

### **Gary L. Tunsky, CNC, ND**

Cellular Disease Specialist and International Speaker/Author representing (PHT) Precision Healing Technologies. He is a traditional naturopath and has a 24-year diverse background in a wide array of healing arts. He has opened up new doors to the world of customized human cell restoration treatment protocols and applies strategies for full body detoxification, herbology, heavy metal chelation, oxygen/ozone therapy, homeopathy, vibrational/energy medicine, immune modulation therapy, pH modulation, metabolic typing and biological response modifiers. His non-toxic, non-invasive cellular treatment strategies are directed to a wide spectrum of degenerative, metabolic and autoimmune disorders that are so prevalent in the 21st century.
