4 GENERATIONS OF NO VACCINATIONS

The power that made the body has the power to heal the body! Do you think that God worked so hard to make us so perfect, that He would have forgotten an excellent immune system? Or do you think that He would have made us with such imperfections that we are vaccine deficient, aspirin deficient, lack antibiotics? I guess the question is: do you believe in God or man? Personally, I trust God over man any day. This is how my family has been raised and hopefully will continue to be raised for generations to come.

At birth, the body has everything it needs for the rest of your life including antibiotics, penicillin, pain killers, anti-inflammatories and natural immunities, especially if you are being breastfed. God built your body so that a man and women can join together as one and conceive a beautiful baby. That baby grows inside the mother’s womb and nine months later is born so perfect. Then immediately the baby is vaccinated and drugged before even being fed or held by the parents. Well most of you have been vaccinated within a few hours of your life and never had a chance to build a great immune system. Someone convinced your parents that you could not live without them and you need the vaccines to be healthy, right?

My family has never been vaccinated in four generations. We are living proof of natural immunity and trusting in God. The chances of dying or having serious problems from any of the childhood diseases are slim to none, but the chances of having any reactions or serious problems from the vaccines are at least 10 times greater. Again, who do you trust more man or God?

Let’s start with my grandparents on my dad’s side. My grandmother died, due to a medical mistake while giving birth to her twelfth child, leaving my grandfather alone with 11 children still living at home. A few months later, he found out that he was diabetic and he had a few months to live. Being a very religious man, he prayed to God and he was directed to my great uncle who was an MD, naturopath and chiropractor. This uncle looked at him and said “You have a pinched nerve in your spine which is interfering with your communication to your brain and your pancreas, so let’s free that interference then let God to the rest”. Your body heals from above down inside out not outside in, so my grandfather lived until the age of 78 eating anything and everything and weighed approximately 350 pounds. After discovering chiropractic, my grandfather had all the children treated allowing nature to provide. From that point on, he never allowed any of his children to take any medications whatsoever.

My grandparents on my mother’s side could not have children and went to a chiropractor after 8 years of the medical game with no success. A pinched nerve was found in the lower back, stopping the communication from the brain to the reproductive organs. After three adjustments my grandmother got pregnant and had 5 children. My grandfather wanted him to undo it after!! HaHa!! Well after seeing that the body works from within and understanding that we are born with everything we need, if something is not functioning then we must restore from within. They were never vaccinated, because they were born way before the vaccines were introduced. Both my grandparents were teachers.
and back then when they vaccinated, they never asked for parent consent. They taught their kids that if they realized they were in line to be vaccinated, they had to get out ASAP and make up an excuse like “I need to go to the bathroom, I feel like I am going to throw up, twist your ankle”. Whatever it took, but get out of line or they will poison you! The five kids did this and a few days after the vaccines were administered; the school would notice the Kirk kids were not vaccinated. They would tell my grandparents that their kids could not be in school, so my grandfather would take all his kids home. A day or two later, the school would call and say by law your kids must be in school. He would bring them back to school. A few days later they would look at the files and say, “Your kids need vaccinations or they can’t go to school.” He again, would take the kids home. After a few weeks of stupidity, the school would say, “If there is an epidemic of any disease, you will have to remove your children from the school until its safe.” So they agreed and never had another problem again. All five are still alive today and none of them have ever been vaccinated.

My grandfather also told us one other important survival tip. He said, “If we ever had to go to the hospital for any reason that we must be totally mean, loud, disruptive, and nasty.” He said, “The law states they must take care of you no matter what, but if you act like this they are only going to do what is absolutely necessary. They will release you and that is what you need. Wow! What advice!

My mom and dad are both chiropractors today and have kept up their health and the tradition of believing in our innate ability to heal. They had three children and all three are chiropractors. They have never been vaccinated, nor taken any kind of drug whatsoever. Not even one aspirin or antibiotic in our lifetime! We all three have children. My sister, Micheline, has two children, my brother Marcel has four children and I have four children. None of our children have ever been vaccinated or taken any kind of medications for any conditions ever. We are all health, happy and successful people. By the way, none of us including my brother, sister and our children have missed any days of school for being sick from kindergarten through our doctorate degree.

Do you want to learn about what drugs can do? Look up the tribe of Hunza from south Russia. There was a great article written in the national geographic magazine in 1973 about this tribe and how they lived to the average age of 125. They were still working, eating only what the land provided them in a pure form and sexually active.

The National Geographic reporters interviewed a couple who were 109 & 120 years old. When asked about sex they where embarrassed and answered “It’s not like it use to be. It’s only once a day, because we are getting older.” Within a few years of this article an American medical team went to visit this tribe. They did not want to learn from there successes, but teach them how much we can help with health in America and help them increase their lifespan and improve their health. They brought over vaccines and incorporated some basic drugs. Within a few years, their average age had dropped to 75 and there was no one left older than 100. The health report was the same as America. I don’t know what you believe, but if that’s not proof enough for you I don’t know what is.
I am not saying to neglect your health, because it takes effort on your part to keep yourself fit. You must have proper rest, a great attitude, regular exercise, good nutrition, proper hygiene, and full brain communication to the body so that it can heal. There are many natural ways to help you when something goes wrong. Ask your grandparents they know a lot of fabulous healthy natural remedies.

God gave you one earth suit and you must live with it until you die. I think you better take care of it. There are no exchanges and once your earth suit has been worn out, you must live with it anyways.

How did we stay so healthy? Our parents raised us with a positive atmosphere, always trying to say encouraging things. They made sure we had plenty of rest; we ate lots of fruits and vegetables and drank mostly water. We were involved with sports and were adjusted at least once a week. Do you know how healthy we are? We have never even had a cavity in our lifetime and I am 41 years old. Drugs eat your enamel off our teeth! We were so trusting in God that we all had home births, because we did not want to be threatened, forced or pressured to use any drugs or surgery. We were having a baby, not dying of any disease! We all enjoyed our births and babies. When you look at the birth process and allow nature to take its course, it is so amazing and breath taking because it is the best miracle you can ever experience. Why would you jeopardize this?

To understand how the body works, you must understand that the brain controls the whole body. The brain communicates with the body by different signals, which include pain occasionally. Everyone thinks that pain is your enemy and you should stop the pain any way you can. But if your house was on fire and the fire alarm sounded off, would you try to put out the fire or simply turn off the annoying alarm and watch your house burn? Why wouldn’t you do the same for your body? When there is a pain signal released, there is a major problem that needs to be attended to. Your body needs some rest and the American way is take a pill, remove the pain and keep on working or playing. One day, when the medications aren’t strong enough you need to increase them. Then your problem is so big that the meds do not work anymore and now it’s time for surgery. God gave organs that are unnecessary and must be removed, right? God must not have been paying attention when he developed the human being. I think He knew exactly what He was doing and we’ve given man His power!

Due to strong evidence about vaccines, my dad’s uncle who is the MD, chiropractor and naturopath went to court against the Quebec medical association (like the AMA here in the US) for vaccinations. He won in Supreme Court in the 1960’s that vaccines cannot be mandatory and hasn’t been since that day. He had to have some very concrete facts to win in court. Unfortunately all his writings are in French, but maybe one day we can get them translated.

Well this is our story of the Legault/Kirk/Valcourt families!!

I guess the bottom line of it all is: Do you truly believe in God or not?
