

Gary L. Tunsky, CNC
4371 Northlake Blvd, Suite 333
Palm Beach Gardens, FL 33410
561-863-1733 / 888-863-1733

Gary L. Tunsky with Precision Healing Technologies is a traditional naturopath and has a 24-year diverse background in a wide array of healing arts. He is an international speaker/author/lecturer and a professional member of AANC & ABEIM (Academy of Biological Environmental Integrative Medicine). He frequently hosts a variety of radio and television talk shows. Included in a partial list are “The Power Hour” with Captain Joyce Riley, “The Trinity Broadcast Network” and “WYKE Christian Television”.

Gary has authored the extraordinary book “The Battle For Health is Over pH” and has recently co-authored with Dr. Leonard Horowitz in his masterpiece, “DNA: The Pirates of the Sacred Spiral”. Dr. Tunsky is currently in his finishing stages of completing his new revolutionary book titled, “What in the Cell is Going On?” and currently has both books available on CD.

Tunsky has opened up new doors to the world of customized, multi-faceted, integrative, human cell restoration treatment protocols. He applies strategies for full body detoxification, herbology, heavy metal chelation, oxygen/ozone therapy, homeopathy, vibrational medicine, immune modulation therapy, pH modulation, metabolic typing and biological response modifiers. His non-toxic, non-invasive cellular treatment strategies are directed to a wide spectrum of degenerative, metabolic and autoimmune disorders that are so prevalent in the 21st century.

Gary’s profound insight into Nutritional Biochemistry has earned him a reputation as being one of the top product formulators for cutting edge herbal and nutritional formulas. He is in the process of formulating the world’s first 24-hour comprehensive, full body detox and cellular cleanse system (Dr.Celltox).

Tunsky’s numerous articles published in health & wellness journals and grass roots publications has brought him recognition from Baylor University. He presented his wisdom on unified systems theory to the resident doctors, as a liaison between allopathic pharmaceutical medicine (symptom suppression) and naturopathic (treat the cause) non-toxic medicine.

Tunsky’s presentation “What in the Cell is Going On” will be based on the accumulative knowledge and wisdom of compartmentalized, fragmented data and scientific facts. He has extracted his findings from hundreds of medical research books, thousands of scientific journals/peer reviews, coupled with 20 years of clinical experience with close patient observation. His gifted ability to see outside the box will explain in explicit detail how the cells function, and by correcting cellular malfunction all disease process can be reversed by normalizing cell process to homeostasis.

Tunsky's clinical experience treating thousands of patients as a cellular disease specialist, has established the foundation of his Grand Unified Theory of the ONE DISEASE. This will bring to his audience an island of clarity from a sea of scientific chaos, mystery and confusion. His extraordinary insight into uncovering the hidden culprits and common denominators lurking behind all health related issues, will bring you a panoramic view of all the missing pieces to the cellular disease mystery puzzle. His presentation will provide a powerful framework in revealing the true causes of every descriptive dis-ease label known to man, establishing the foundation of his simplistic unified theory of the ONE DISEASE – "Cellular Functional Disorder".

Gary's profound world changing revelation of "Cellular Functional Disorder" in the new research field of Cytopathy (the study of cellular disease) is scientifically grounded in the inter-related synchronized relationships between Molecular Biology, Cell Physiology, Nutritional Biochemistry, Homeopathy, Electrogenetics, Microbiology, Homotoxicology, Clinical Ecology and Quantum Physics.

Tunsky's persistent inquiry of famous, outside the box pioneering scientific minds of 20th and 21st centuries has led him to a profound discovery. There is no compartmentalized science in and of itself that has all the answers, no matter how much compiled data they obtain from research. Cellular communication, cellular health and vitality are built on a synchronized variation of 12 organs and systems interdependent of one another.

Gary's revolutionary unified theory of Psycho, Pulmonary/Circulatory, Neuro-endocrine, Muscular-skeletal, Renal-hepatic, Gastric, Lympho-augmentary, Immunology through cellular ligand receptors and peptide communication links, will change the face of medical science. With this new biology based on the simplistic understanding of cell function, we will finally recognize the existence of only ONE DISEASE rather than 10,000 plus descriptive labels placed on the ONE DISEASE. Mainstream science has us believing that there are over 10,000 different diseases, demanding thousands of different treatment protocols. This medical mistake in breaking up science into the "gist" specialty fields (neurologist, endocrinologist, cardiologist, etc.) has become obsolete and counter productive.

To date, the implementation of Gary's Grand Unified Theory of "Cellular Functional Disorder" has had a profound impact on uncovering the mysteries to a wide array of disease labels such as cancer, diabetes, cardiovascular disease, arthritis, chronic fatigue syndrome/fibromyalgia and ALS. In short, Tunsky is a pioneer paving the way to the leading edge of tomorrows paradigm shift to cellular health care and disease prevention.
